

# HELP WANTED:

## PRESS BRAKE OPERATOR

Midway Iron & Metal in St. Cloud Minnesota is looking for an experienced press brake operator.

Midway is a family owned and operated recycling center and metal service center that has been serving Central Minnesota since 1959.

In our metal service center, we provide custom cutting, sawing, and bending services. As such the press break operator must be able to configure the machine for custom parts on a regular basis.

We are looking for efficient, reliable, hardworking employees that show up for work on time, every day.

### Responsibilities:

- Set up and operation of computer controlled press brake.
- Inspect bent parts to verify they are as customer requested.
- Adjust machine when necessary to achieved desired product results.
- Communicate with other employees and/or customer in a pleasant and productive manner.
- Position includes work as general warehouse labor when needed.

### Qualifications:

- 2+ years of experience in both set up and operation of press brake.
- Math, computer skills, and basic metallurgy knowledge with respect to the bending process.
- Must be able to read, write, and speak English fluently for communication and understanding work orders and prints.
- Able to stand for the majority of the work day.
- Able to lift materials to be bent. Sometimes over 70lbs.
- Able to use tape measure, protractor, caliper, and other measuring tools.

### Pay/Hours:

- Pay determined by demonstrated qualifications and experience.
- Daytime work from 8 a.m. to 5 p.m. M-F and every other Saturday from 8 a.m. to noon.  
Opportunities for overtime as needed.
